| Detailed description of project www.eenvplus.eu | | | | | | Type and scope of services provided | | |
| <p>The aim of this European Commission funded project is to integrate a large amount of environmental data provided by the National/Regional Environmental Agencies and other public and private environmental stakeholders involved. This is necessary to answer to the requests for environmental monitoring and reporting requested by the European, national and local policies.</p> <p>This will be achieved through the harmonisation and integration, within an operational framework, of existing services resulting from previous European initiatives (funded projects, good practices, EU/national/local experiences) and it will allow overcoming of cross-border/languages barriers.</p> <p>eENVplus provides not only the ICT infrastructure but also the documentation and support to ensure delivery of an operational infrastructure and which can become profitable, based on a well-defined organisational model and a tutored training framework.</p> | | | | | | <p>eEnvironmental Services foreseen:</p> <ul style="list-style-type: none"> • Harmonisation Toolkit • Validation Toolkit • eENVplus metadata Catalogue • Mobile App Support Service • Thesaurus Exploitation Services <ul style="list-style-type: none"> ○ Metadata Compilation ○ Data Discovery ○ Semantic Explorative Search • Data Access Services <ul style="list-style-type: none"> ○ Web Map Service (WMS) ○ Web Feature Service (WFS) ○ Web Coverage Service (WCS) ○ Catalogue Service for Web (CSW) ○ Sensor Observation Service (SOS) • Web Processing Service (WPS) • Orchestration Service • Reporting Service • Crowdsourcing Service • Validation Service • Ingestion Service and Work Flow • Advanced (3D/AR) Visualization Support Service | | |
